**Subject:** Computer upgrade

Hi Eric,

We have one computer in the Amherst Lab that is on the DPH network and still runs on Windows 98. I know that the IT department wants to DPH computers to be upgraded to Windows 2000 for the upcoming email system migration to MassMail. I think we will need a newer computer for this upgrade. We just finished upgrading all the computers in our Jamaica Plain lab, and I know that they would like us to get going on this last one
